ELSEVIER

Journal of Molecular Liquids 64 (1995) 301–302

journal of MOLECULAR LIQUIDS

Volume contents

(Abstracted/indexed in: Chem. Abstr., Chem. Citation Index, Curr. Contents Phys. Chem. Earth Sci.)

Vol. 64 Nos. 1–2

Special Issue: Ultrafast Phenomena in Liquids and Glasses

Preface ix

Hydrogen bonding influence on the intermolecular vibrational spectra of liquid methanol
J. Martí, J.A. Padró and E. Guàrdia (Barcelona, Spain) 1
Structural reorganization and dynamics during the slowing down of the relaxation in aqueous electrolyte solutions LiCl, RH_2O
J. Dupuy-Philon, J.F. Jal and B. Prével (Villeurbanne, France) 13
HCl acid ionization in water: a theoretical molecular modeling
K. Ando and J.T. Hynes (Boulder, CO, USA) 25
Reaction dynamics across glass transition region
A. Plonka (Lodz, Poland) 39
Proton and electron transfer in hydrogen-bonded systems
J. Waluk (Warsaw, Poland) 49
Ultrafast electronic relaxation dynamics: a comparison between water and ionic aqueous solutions
Y. Gauduel, H. Gelabert and M. Ashokkumar (Palaiseau, France) 57
A Raman study of solvent effects on vibrational dynamics of axial and equatorial conformers in chlorocyclohexane
G. Waliszewska and H. Abramczyk (Wróblewskiego, Poland) 73
Ion adsorption on metal surfaces. The role of water–metal interactions
E. Spohr (Ulm, Germany) 91
Femtosecond absorption and emission spectroscopy of the DCM laser dye
S. Pommeret, T. Gustavsson (Gif-sur-Yvette, France), R. Naskrecki (Poznan, Poland), G. Baldacchino and J.-C. Mialocq (Gif-sur-Yvette, France) 101
Computer simulation studies of solvent effect on electron transfer in acetonitrile solutions
M. Hilczer (Wróblewskiego, Poland) and M. Tachiya (Ibaraki, Japan) 113
Theoretical and experimental spectroscopical study of solvation dynamics
B.D. Fainberg and D. Huppert (Tel Aviv, Israel) 123
Infrared pump-probe spectroscopy of water at subpicosecond time scales. A theory
S. Bratos and J.-Cl. Leicknam (Paris, France) 151
Salt effect on transient proton transfer to solvent and microscopic proton mobility
N. Agmon (Jerusalem, Israel), S.Y. Goldberg and D. Huppert (Tel Aviv, Israel) 161
Vibrational spectroscopic studies on the state of aggregation of water in carbon tetrachloride, in dioxane and in the mixed solvents
E. Zoidis, J. Yarwood (Sheffield, UK), T. Tassaing, Y. Danten and M. Besnard (Talence, France) 197

Vol. 64 No.3

The p, T-dependence of self diffusion in liquid 1-, 2- and 3-pentanol
N. Karger, S. Wappmann, N. Shaker-Gaafar and H.-D. Ludemann (Regensburg, Germany) 211
Inelasticity effects in the neutron diffraction measurements from water steam using pulsed sources
P. Postorino, M. Nardone, M.A. Ricci (Rome, Italy) and M. Rovere (Arcavacata di Rende, Italy) 221
Bridging the gap between the ultrafast and the ultraslow
A.L. Edelstein and N. Agmon (Jerusalem, Israel) 241
Dielectric studies of allyl alcohol with (i) pyridine, (ii) 1,4-dioxane and (iii) phenol hydrogen bonded complexes
V. Satheesh, M. Jeyaraj (Sivakasi, India) and J. Sobhanadri (Madras, India) 247
A depolarized Rayleigh-scattering study of CS_2-benzene liquid mixtures and the comparison of the interaction induced dynamics with far infrared
E. Zoidis and T. Dorfmüller (Bielefeld, Germany) 263
Non-ergodicity of transient open chain-association in liquids
P.L. Huyskens, D.P. Huyskens (Heverlee, Belgium) and G.G. Siegel (Mayaguez, Puerto Rico) 283

Volume Contents 301
